

## About the WVGenWeb Project:

State Coordinator: Les Shockey  
Assistant State Coordinator: Connie Burkett

The WVGenWeb is a loosely woven, non-profit grassroots association of individuals interested in preserving and freely sharing all types of genealogical and historical records about the state of West Virginia. West Virginia was known as Western and Northwestern Virginia prior to its formation as a state in 1863. The WVGenWeb provides a central location for this information by means of computer networking via the Internet.

Each county in West Virginia has its own web page or pages. The pages may contain a variety of information and visitors are encouraged to visit each site that interests them to see what is available for that particular county.
